A modern facility overcoming site issues including ground bearing conditions and flooding levels.

Carter Construction were appointed by site developer, Morgan Industrial Properties (MIP) to create a modern, commercial facility overcoming site issues including ground bearing conditions and flooding levels.

Having worked with Carter Construction on several projects, Robinson were appointment based on price, quality, service and the ability to communicate and integrate within Carter Construction's own build team.

Robinson worked with Carter Construction to deliver a traditional portal framed building with an integrated mezzanine floor to 5 bays. The building also showcases a stunning glazed feature entrance to the front elevation.
