

Industrial

Ivygrove Developments Ltd Eagle Park

Project Type Mixed use Commercial Buildings

Location Alferton Road, Derby

Steel Tonnage 600 tonnes

Works Carried Out Structural Steelwork

As Ivygrove's preferred steelwork contractor, Robinson provide structural steelwork and associated sub-trades across a number of new commercial buildings over a 14 acre site at Eagle Park.

Ivygrove Developments Ltd is Derby's leading provider of commercial premises to SMEs. Units on the Eagle Park development range from 400m² to 2000m² for industrial, warehouse, manufacturing and trade counter uses.

Working alongside the main contractor and their sub-contractors, phasing was a key challenge as there was restricted working areas due to following trades with limited lay down space. Robinson worked on several sites simultaneously, providing structural steelwork and associated sub-trades including metal decking, pre-cast concrete flooring and stairs.

Working to the tight time constraints stipulated by the main contractor, Robinson constructed a number of new commercial buildings over the Eagle Park 14 acre site, and ensured buildings were completed for phased occupation. Robinson is Ivygrove Development's preferred steelwork contractor, and has been for many years.

"We have entrusted Robinsons to build our Steel Framed Buildings across 4 purpose built industrial development sites, and they have always provided an efficient service, on time and with the highest regard for safety on site."

Nick Blount – Managing Director, Ivygrove Developments Ltd
