Robinson Structures Ltd is a Steel Construction Specialist who provides 'concept to completion' build projects to the Agricultural, Commercial and Industrial sectors. The company is a family business which has grown into one of the most recognised names within the steel industry.

Purpose of role:

To be responsible for the efficient running of the CNC machines, which Robinson Structures currently operate; namely the FDB and the XDM, along with two different types of Steel sawing machines. A key responsibility is to ensure the smooth workflow of the appropriate steels for each job/contract so that they are timely received by the Fabricators/welders in the workshop.

To support in the organisation of the steel lots as they come off the saw /drill lines so that they are identifiable to the contract, so that they can be easily transferred to the 15 Fabrication bays by the Material Handler. To liaise with the Supervisor and Prep Coordinator to ensure smooth running of the factory..

Responsibilities/Duties:

- Review the production plan with the Supervisor, so that daily targets are clear.
- Follow the Daily Procedures as stated in the Work Method Statement
- To follow the cutting/sawing programme as required for optimum efficiency of the production factory.
- Carry out appropriate maintenance and cleaning of the machines.
- Maintain high standards of health and safety at all times.
- Ensure the highest of quality work standards are delivered.
- Manoeuvre and work on the appropriate steels as per the plan.
- Work as an effective team player within the department.

Skills, Experience and qualities:

- Structural Steel experience
- Experience and working knowledge of CNC structural steel machinery from Peddinghaus, Ficep, Kaltenbach), such as plate processors, saw drills and associated handling systems including the related programming/operating software.
- Experience in handling structural steelwork components, including the use of overhead cranes up to 10T SWL.
- Certified to use 5-10 Tonne Gantry cranes
- Understand and appreciate the importance of machine maintenance and cleaning.
- Work to high quality standards
- Have the ability to work on own initiative to targets set by the line manager.

Personal qualities:

- Highly Health and Safety conscious
- Highly organised and methodical in approach to working practises.
- Ability to read numbers accurately with high attention to detail.
- Diligent and proactive – always thinking ahead.
- Good communication skills
- Flexibility at all times.
- To display our Company values at all times. These include 'Respect, Team Spirit, Professionalism, Excellence and Creativity'
