About the Company

Robinson Structures Ltd is a Steel Construction Specialist who provides 'concept to completion' build projects to the Agricultural, Commercial and Industrial sectors. The company is a family business which has grown into one of the most recognised names within the steel industry.

Our people and our clients are at the centre of everything that we do. Our **core values** are therefore integral to the way that we interact with each other and our clients. The importance of Respect, Team-spirit, Professionalism, Excellence and Creativity form the heart of our business and we aspire to maintain these standards in all transactions both internally and externally.

We are recruiting for both **Day-Shift and Late-Shift Fabricator Welders**, responsible for the fabrication of structural steel work construction projects within the workshop team, ensuring that the business meets its production/delivery schedule on time. A key responsibility is to ensure the high-quality fabrication and welding requirements meet client specifications first time, every time

The Role (not limited to)

- As a fully qualified Fabricator/MIG Welder, the successful candidate will follow all safety precautions whilst working with various structural steel types, such as columns, beams & rafters, including haunches.
- You will work within one of the 15 fabrication bays, liaising closely with the Material Handler, Quality Assurance Inspectors and your Supervisor to ensure the smooth workflow of the factory operation.

About you:

Essential Skills and Experience:

- Structural Steel experience.
- At least 3 years' experience and working knowledge as a qualified MIG Welder.
- Ability to read and understand engineering drawings.
- Ability to set up and operate fabricating equipment, such as grinders, drills.
- Ability to set up components for welding according to specifications.
- Experience in handling structural steelwork components, including the use of overhead cranes up to 10T SWL.
- Certified to use 5-10 Tonne Gantry cranes.
- Understand the importance of legal compliance and steel identification tracking.
- Work to high quality standards with the ability to inspect your own work. Work with the Welding Quality Assurance inspectors (internal and external) as required.

Personal qualities:

- Highly health and safety conscious
- Strong ability to focus with high attention to detail for accurate measuring.
- Methodical and diligent in approach to work.

- Ability to work on own initiative, with an aptitude to solving problems.
- Proactive and flexible attitude
- Good communication skills and able to work well in a team.
- Good attendance and timekeeper.
- To display the company's values at all times; 'Respect, Team Spirit, Professionalism, Excellence and Creativity'
- Be flexible to work overtime as required.
- Live within a commutable distance and have the right to work in the UK.

To apply

Please send an email to Jobs@robinsons.com and include your CV and a Cover letter stating how your skills match our requirements.
